AED (Automated External Defibrillator)

An AED (Automated External Defibrillator), is used to help those experiencing sudden cardiac arrest. It's a sophisticated, yet easy-to-use, medical device that can analyse the heart's rhythm and if necessary, deliver an electrical shock, or defibrillation, to help the heart re-establish an effective rhythm.

Target Audience Anyone and Everyone who values life and wants to be life saviour when dealing with medical emergency

Course Description

- Introduction to CPR & AED
- Calling Ambulance – Information to be shared
- Recovery Position – Demonstration and Skill Practice
- Cardiopulmonary Resuscitation (CPR) – Demonstration
- Automated External Defibrillator (AED) – Demonstration and Practice
- Participant's Query session
- Post Training Evaluation & Feedback

Training Methodology

- Discussion & Interaction
- PowerPoint, Audio & Video presentations
- Scenario based Roleplays
- Demonstrations
- Skill Practice by Participants*
- Evaluation

Course Highlights

- Duration: 2 Hours
- Certification: GD Goenka Healthcare & International Accreditation Organization (IAO)
- Validity: 1 Year
- Mode of Training: Online/Offline
