Overview

A career as a dental assistant is one of the most significant careers in the healthcare sector, where teamwork is essential to the success of medical treatments. As a dental assistant, one must make sure that all necessary preparations are made before, during, and after a dental procedure in order to ensure a satisfactory outcome. This certificate course is intended to provide training as well as understanding of dental equipment sterilization and disinfection, patient preparation for treatment and dental surgery, and assistance to the dentist during the operation.

Objectives

After completing this course, participants will be able to:

- Demonstrate the role of Dental Assistant within a variety of dental settings.
- Demonstrate how to mix materials and medicaments to support treatment.
- Demonstrate how to provide basic life support and support the dental team during a medical emergency.
- Demonstrate how to prepare and maintain the clinical environment for a range of clinical procedures.
- Demonstrate how to make appointments and maintain dental schedules.

Pedagogy

Holistic teaching method (blended learning) characterized by its focus approach, stressing the importance of scenario-based practice with the help of latest tools and techniques. There will be comprehensive lab work requiring demonstrated competency to receive a satisfactory grade.
