

Overview

Occupational Therapy Assistant is 11 months' certificate course in which the students will be able to understand the psychological or mental illness of patients and its effects in physical illness and dealing with patients during treatment, rehabilitation and discharge. These assistants and aides help patients develop, recover, improve, as well as maintain the skills needed for daily living and working. Occupational therapy assistants are directly involved in providing therapy to patients; occupational therapy aides typically perform support activities.

Objectives

After completing this course, participants will be able to:

- Assist in evaluation and screening processes by gathering data, administering assessments, assisting with interpretation, reporting results, and collaborating with Occupational Therapist to establish goals.
- Demonstrate the clinical skills and proficiency in all relevant practice areas necessary to fulfill the role as an entry-level occupational therapy assistant.
- Apply knowledge of global practices, scientific practice, medical terminology, and anatomy and physiology in order to demonstrate the basic tenets of entry-level occupational therapy practice.
- Display professional behaviors through self-responsibility, response to feedback, work behaviors, time management, interpersonal skills, and cultural competence.
- Apply the comprehensive learning outcomes identified with the general education component.

Pedagogy

Holistic teaching method (blended learning) characterized by its focus approach, stressing the importance of scenario-based practice with the help of latest tools and techniques. There will be comprehensive lab work requiring demonstrated competency to receive a satisfactory grade.
