Overview

This course is intended for professionals who are interested in a career in special education needs as well as those who are currently employed in a field related to teaching children with special needs. It is a vocational course designed to familiarize our students with the appropriate procedures to follow when it comes to offering guidance and support to the students receiving special education, this one places a strong emphasis on content recognition and support for children with special needs.

Objectives

After completing this course, participants will be able to:

- Show competence through demonstrating content knowledge regarding the principles of behaviour.
- Demonstrate appropriate dispositional qualities by reflecting and show competence through displaying knowledge of special education law and components of individualized education plans with the ability to create relevant functional objectives.
- Through critical inquiry, participate in the development and evaluation of evidence- and research-based practices intended to improve the learning of students with exceptionalities.
- Provide essential services to people of all ages and backgrounds in developing the vital human skill - communication.

Pedagogy

Holistic teaching method (blended learning) characterized by its focus approach, stressing the importance of scenario-based practice with the help of latest tools and techniques. There will be comprehensive lab work requiring demonstrated competency to receive a satisfactory grade.
